Airplane Talk

Mike Denest showed a Chem-Willard Top Dog which he started building 3-4 years ago. This model is covered with Monokote and has Monokote striping. It is powered with an electric motor driven by a 35-Amp system with BEC. All construction used Titlebond glue (no CA).

Mike also showed off a nice Chaos from Laser Works (Action Hobbies) in Texas. This was all laser-cut from a plan and sheet stock. This model will be covered with silk and dope. This is planned to be the 2011 VRCS model.

Bob Fling showed a nice Quaker 56 with Olsen 23 engine. The plane still needs finishing.

Bob also showed the fuselage for a large Quaker with 85" wingspan which will use a TT52 4-stroke engine and will have a removable tail assembly for easier transport. This model still needs covering.
